# 10-YEAR LIMITED WARRANTY

## Limited and Non-Prorated

### WHAT AND WHO ARE COVERED AND FOR HOW LONG

CertainTeed LLC (“CertainTeed”) warrants to the original property owner that its aluminum trim coil products will be free from manufacturing defects — including peeling, flaking, blistering, and cracking — when installed according to CertainTeed’s installation instructions and when subject to normal and proper use. Should any manufacturing defect, as determined by CertainTeed, occur within the ten (10) years after installation, CertainTeed will repair or provide replacement product, at its option, for the defective aluminum products at no charge. CertainTeed also reserves the right to refund the amount paid by the original property owner for the product. CertainTeed will not be liable for any labor charges or other expenses whatsoever in connection with removal or installation of either the original or replacement product. In the event of repair or replacement under the terms of this Limited Warranty, the original warranty shall apply to the replaced or repaired aluminum and will extend for the balance of the warranty period in effect at the time the product proved defective. The 10-year coverage offered by this Limited Warranty automatically ends upon the sale of the property by the original owners of the property at the time of installation.

This Limited Warranty does not provide protection against any failure, defect or damage caused by situations and events beyond normal exposure conditions, including but not limited to:

- misuse, abuse, neglect or improper handling or storage;
- improper installation or installation not in strict adherence to CertainTeed’s written instructions;
- use of accessories which do not properly receive and/or secure CertainTeed aluminum products;
- impact of foreign objects, fire, hail, earthquake, flood, lightning, hurricane, tornado or other casualty or act of God;

CertainTeed’s aluminum products are not warranted against discoloration or other damage caused by air pollution (including but not limited to metallic oxides or metallic particles), mold, mildew, exposure to harmful chemicals, salt spray or normal weathering from the elements.

Normal weathering is defined as exposure to sunlight and extremes of weather and atmosphere which will cause any colored surface to gradually fade, chalk, or accumulate dirt or stains. The severity of any condition depends on the geographical location of the building, the cleanliness of the air in the area, and many other influences over which CertainTeed has no control.

CertainTeed shall have sole discretion to determine, based on reasonable criteria, whether the product is suffering from conditions in excess of normal weathering. If the product weathers to a degree determined by CertainTeed to be in excess of normal weathering, CertainTeed will either repair or provide replacement product, at its option, for the defective product. CertainTeed also reserves the right to refund the amount paid by the original owner for the product only.

*This Limited Warranty does not apply to, and the warranty voided, for material which has been painted, varnished or coated over the manufacturer's original finish, unless approved in advance by CertainTeed.*

**CertainTeed reserves the right to discontinue or modify any of its products, including the color, without notice to the property owner. CertainTeed shall not be liable in the event the replacement product varies in color or gloss in comparison to the original product. If CertainTeed replaces any product under this Limited Warranty, it may substitute products designated by CertainTeed to be of comparable quality, appearance or price range in the event the product initially installed has been discontinued or modified.**

## CARE AND MAINTENANCE

While CertainTeed aluminum products resist most common household stains like oil and grease, they will become dirty like any other product that is exposed to atmospheric conditions. Chalk may also accumulate on the surface. This is a normal condition for all pigmented materials which are constantly exposed to sunlight and the elements. Soil, grime and chalk can be removed with the help of your garden hose and a bucket of soapy water. If especially stubborn stains cannot be removed with normal household detergents, request a cleaner from your contractor. Always test any cleaner on an inconspicuous area before full use.

Mold and mildew may be a problem in some areas. It appears as black spots on surface dirt and is usually first detected in areas not subjected to rainfall, such as under eaves and porch enclosures. For removal, prepare a solution as shown. (Caution: Greater concentrations may cause damage to aluminum products.)

Mix together: 1/3 cup of detergent (Tide, for example), 2/3 cup of Trisodium Phosphate (SoilMax, for example), one quart of 5% Sodium Hypochlorite (Clorox, for example) and three quarts of water.

If the above solution does not readily remove the mold or mildew spots, request a mold and mildew-type cleaner from your contractor.

*NOTE: The chemical agents referenced herein may be hazardous to the user or to the environment. Be sure to follow all precautions and warnings on the product label, and particularly those which may be necessary to prevent personal injury. Please dispose of these chemical agents in a manner prescribed by the manufacturer. If you are unsure how to use or how to properly dispose of these chemical agents, contact the manufacturer of these products for instructions.*
